User Testing Results and Review

Testing Methods:

Participants were given ~10 minutes each to play *Clone Hero* using the custom controller. Then they were presented with the questionnaire to receive the following data and results.

Demographic Results

Out of the 8 users who gave their input, six were male and two were female. The level of experience varied, but seven of the participants had at least some experience with other guitar-style controllers.

SUS Results

Summary:

The usability results were as follows, the majority of participants could not see themselves using the controller very often, although this was mostly due to a lack of interest or time in playing rhythm games. The majority of participants found the controller uncomplicated and easy to use, only taking a minute or two to figure out what each input was, or after a light explanation. The only friction was around the size of the controller, with users having mixed opinions on how comfortable the wide neck of the controller was to use. Additionally, users gave mixed results on how confident they were when using the controller, with the more experienced users stating higher levels of comfort than the others.

Takeaways:

- Controller is easy to understand and use without too much prior knowledge or technical expertise.
- Controller is light
- Controller can be slightly thinner to accommodate more hand sized and grip placements

TLX Results

Task	MD	PD	TD	PF	EF	FR	r-score	w-score
	40	20	50	60	30	20	36.6667	NaN
	40	60	80	50	60	30	53.3333	NaN
	40	70	80	50	70	30	56.6667	NaN
	80	90	80	80	80	50	76.6667	NaN
	40	60	60	20	70	30	46.6667	NaN
	70	70	70	80	60	50	66.6667	NaN
	80	90	90	90	80	60	81.6667	NaN
	70	60	60	30	60	20	50.0000	NaN

Summary:

There was a decent amount of variance in the r-score in this user test, with the average being 58.53. This suggests a more intense medium workload for the task of playing with the custom controller. While the task is not hard to understand, the act of executing can be challenging depending on experience and comfort level.
